GRADUATES 2012

POZNAN UNIVERSITY OF MEDICAL SCIENCES, POLAND

General information

For over 91 years the Poznan University of Medical Sciences (PUMS) has been educating medical practitioners in the Wielkopolska region, and the programs for education in English have gradually become an integral part of it during the past 19 years. Currently (according to the rankings of "Perspektywy," Rzeczpospolita," and "Wprost" magazines), PUMS enjoys the top position as the best and the largest medical university and clinical research center in Poland that provides to its students the highest number of medical specialty areas to choose from. All of the research and clinical teaching activities are conducted here in close partnership with six clinical hospitals and its new consolidated campus is growing quickly.

In the present academic year, there are over 8,000 students enrolled with more than 1,000 from other countries. Thus PUMS is also the only medical school in Poland with such a high number of foreign students. It makes the learning experience in Poznan a richer one for all concerned: students, faculty, patients, as well as the Poznan residents. During the past 19 years, students from 44 countries have studied and lived here — and this list continues to grow with each year.

Admissions

Students enrolled at PUMS may choose from the following five fields of study in English:

- 4-year M.D. program (since 1993)
- 6-year M.D. program (since 1995)
- 5-year D.D.S. program (since 2001)
- 6-year Pharm. D. program (since 2004 as a 5-year program, in 2009 replaced by a 6-year program)
- 3-year B.Sc. in Physiotherapy program (since 2009)

PUMS administers the admissions process through its Admissions Offices in USA, Norway, Taiwan, Israel, Canada and Poland.

University staff

The Poznan University of Medical Sciences employs 2,000 people. Half of it comprises the administrative personnel, and the other the teaching and research staff whose high level of education and vast professional experience have made the Poznan Medical University the best institution of its kind in Poland and in Central Europe. A majority of our faculty have received Ph.D. and post-graduate degrees, and they hold the following titles: full professor, professor, assistant professor, or associate professor in - medicine, dentistry, physiotherapy, pharmacy, and other areas of science. Therefore, PUMS is well endowed with outstanding faculty members who offer their support and guidance to the scores of students pursuing different specializations and degrees at graduate and post-graduate levels.

Our faculty - to name a few - are credited with introducing pioneering medical techniques in bone marrow transplants, heart surgery, cancer of the eye surgery, and hybrid implants for ear and nose cancer patients.

International cooperation

One of the top priorities for the growth of the University is the expansion of the various forms of collaboration in the areas of teaching and research. Until present, the University has entered into more than 30 long-term partnership agreements with medical universities worldwide, including: Germany, France, Italy, Sweden,

Norway, U.S.A., China, Japan, the Ukraine, and Belarus. These collaborations engage both faculty and students at PUMS through: joint research and participation in international programs and research projects; joint publications and participation in scientific conferences; as well as through numerous student and faculty exchanges. Among the sponsors for the PUMS research and teaching staff is the EU Framework program.

Competency based curriculum

The Poznan University of Medical Sciences aspires to develop rich and exciting curricula. Students are presented with specific subject matter together with clinical objectives and potential outcomes, so that both student expectations and evaluations either in the basic sciences or in the clinical studies are made very clear by the respective faculty members. Furthermore, students receive training in problem-based learning through extensive use of brief clinical case studies in the basic sciences. In order to strengthen the existing practices on teaching methodology, PUMS has established the University System for Quality Assurance in Teaching and Learning.

Through the investment in the opening of the brand new, or the upgrading of several existing, facilities the quality of learning at PUMS is constantly improving.

Accreditation

Since starting the Center for Medical Education in English, the Poznan University of Medical Sciences has received international accreditation from the following institutions in the United States and Europe: Department of Education, Educational Commission on Foreign Medical Graduates (ECFMG), Medical Board of California, National Board of Medical Examiners, National Accreditation Commission, European Union Council.

The above-listed accreditation privileges enable our graduates to have a smoother transition into their professional lives upon return to their home countries.

Graduates around the world

When the first international students enrolled in 1993, they were drawn to Poznan by the high quality of teaching and work of the University faculty, many of whom have come to serve on the boards of professional and scientific associations; have been invited to serve as advisors to the WHO and IAEA organizations; and have become outstanding clinical specialists and heads of hospital departments in Europe, North America, South Africa, and elsewhere. Over the years, the PUMS faculty and research staff have been receiving prestigious awards and wide recognition for the excellent quality of their work, innovations, research, and teaching; hence, many have been sought after by the world's advanced medical centers. For example, in 2008 Dr. Maria Siemionow, a PUMS graduate and professor of surgery, has been responsible for leading the landmark face transplantation surgery at the Cleveland Clinic in the U.S.A.

Alumni Association

Inauguration of Alumni Association of English Programs' graduates took place in May 2007 during a special dinner organized to celebrate the 10th graduating class of English Programs.

In April 2009 a solemn meeting of the University's Alumni was held in the Polish Embassy in Washington D.C. At this meeting the authorities of PUMS presented a proposal of setting up the Alumni Association in the U.S with the following goals:

- sustaining contact with the University
- opening possibilities for further scientific cooperation and professional development of Alumni
- establishing contacts of Alumni with our students and supporting the ablest of them.

More information on the Association's activities will be available at the University website at www.pums.ump.edu.pl under the heading Information for Graduates.

President of the Poznan University of Medical Sciences, POLAND

Professor
Jacek Wysocki, M.D., Ph.D.

Former Presidents of the Poznan University of Medical Sciences, POLAND

Professor
Antoni Pruszewicz, M.D., Ph.D.
1987-1993

Professor
Janusz Gadzinowski, M.D., Ph.D.
1993-1999

Professor
Leon Drobniak, M.D., Ph.D.
1999-2002

Professor
Grzegorz H. Bręborowicz, M.D., Ph.D.
2002-2008

Deans of Medical Faculty II, Faculty of Pharmacy and Faculty of Health Sciences

Professor
Andrzej Tykarski, M.D., Ph.D.
Dean of Medical Faculty II

Professor
Edmund Grześkowiak, M.Sc., Ph.D.
Dean of Faculty of Pharmacy

Professor
Włodzimierz Samborski, M.D., Ph.D.
