

Rules for awarding Student Awards for scientific achievements by the Center of Medical Education in English

The Award aims to honour the scientific activity of CMEE students who publish articles in peer-reviewed journals, participate in research grants, and make presentations during scientific meetings. All scientific activities must be affiliated with Poznan University of Medical Sciences.

The CMEE also recognizes students who demonstrate outstanding commitment to mentoring fellow students and supporting their involvement in scientific research.

1. The Student Award is an annual individual or team monetary award conferred through competition for outstanding, precisely defined and confirmed published papers in peer-review journals, research grants, and communications during the student's study period at PUMS. Achievements that will be realized in the future cannot be submitted for the award.
2. The Student Award is granted in three categories (I°, II°, III°) according to the JCR Impact Factor of journals and Ministry of Education scores, the role of the student in the research grant, a form of scientific communication (i.e. oral or poster, during local or international conferences). If students apply for a team award, it is necessary to assess each student's involvement in the project (expressed as %).
3. Attachments must prove all scientific activities: pdf of the full version of the published article, certificate of communication during a scientific meeting, and confirmation of participation in research grant signed by the principal investigator/grant holder.
4. The Award may be received only once for each scientific activity (article, communication, grant).
5. Each scientific activity submitted for the competition must be affiliated with Poznan University of Medical Sciences.

6. The Prize is awarded by the CMEE Deans' Council, which serves as the jury for the competition.
7. Applications must be submitted through the online application form made available by CMEE in the competition announcement.
8. Possession of a PESEL number is a requirement for receiving the prize.
9. The number of awards and their amounts depend on the budget and the final decision of PUMS Rector.

10. Recognition of Student Research Mentors

An annual non-monetary award is granted to up to 15 CMEE students for outstanding involvement in mentoring and supporting fellow students in scientific research.

Eligible candidates include members of the Executive Board of the English Students Research Association (ESRA) and presidents or vice presidents of student research groups.

The award is granted for documented mentorship activities undertaken during the academic year, including assistance in developing research ideas, supporting students throughout the research process, identifying research opportunities, and promoting student involvement in scientific activities.

Recipients are selected by the CMEE Deans' Council based on recommendations from the ESRA President, Vice President, Trustees, and Chief Research Officer.

The award is granted in the form of a certificate of recognition and does not include a monetary prize.
